Carousels	16

COMPLETE PROJECTS & INSTALLATIONS

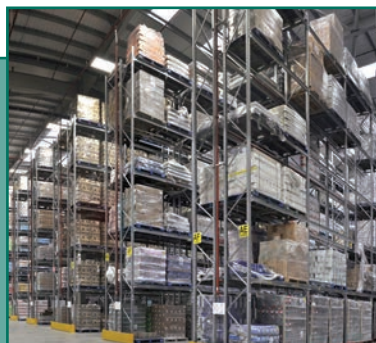

- A - Racking
- B - Safety Mesh
- C - Lockers
- D - Barriers/Rails
- E - Access Equipment
- F - Small Parts Shelving
- G - Maxi Bins & Louvred Panels
- H - Order Picking Trolleys
- I - Hi280 Shelving
- J - Drawer Cabinets
- K - Workbenches
- L - Seating
- M - Mezzanine Floors
- N - Longspan Shelving
- O - Mobile Shelving
- P - Sack Trucks
- Q - Pallet Trucks
- R - Construction Tube

Big Project?.....no problem?

- » If your storage requires a more bespoke solution, we can help.
- » We can advise you on a wide range of systems which will help increase your storage efficiency.
- » After discussing your requirements with you, we will design, project manage & install your system, helping you implement the new facility with the minimum of disruption.
- » From mezzanines to conveyors, from drive-in racking to multi-tier structures, we are here to help.
- » If you have a project brief to take forward or would like to arrange a site survey, just pick up the phone & talk to us.

Mezzanine Floors

A mezzanine floor is a quick & easy way of utilising the available height of a building, by doubling or even tripling the available floor space. Installed quickly & cost effectively, a mezzanine floor can prove to be a rational alternative to relocating your business or expanding your premises. Mezzanine Floors are typically designed as free-standing platforms & comprise cold rolled galvanised secondary floor beams bolted into the main universal beams, in turn supported by rolled hollow section steel columns. This structure is topped with a tough 38mm thick tongue & grooved particle board, although we can provide alternatives when required.

Applications:

Storage purposes

Installing a mezzanine floor is an ideal way to solve any storage issues that your company might have. Shelving & racking can be installed on the storage level, or it can just provide a new storage platform for palletised goods.

Office accommodation

By utilising the available headroom in your premises with a mezzanine floor, additional office space can quickly be created. This is a relatively cost effective solution, allowing a business to increase its headcount, under the same roof!

Retail sales space

A Mezzanine floor can be used to increase retail floor space. Our floors fit seamlessly into a retail space, and we have a huge selection of high quality decking, staircases & handrail options to choose from.

BUILDING REGULATIONS

We will make sure that your new mezzanine floor is designed in compliance with all the current Building Regulations, British Standards & best practice guidelines. We will submit the plans to your Local Authority/Approved Building Inspector, to get approval and all the required consents. We will also ensure all the necessary Fire Regulations, health and safety & access regulations are taken into consideration when we are designing, manufacturing & installing your mezzanine platform.

Mezzanine Floors

As well as the mezzanine floor itself, there are many other associated products to be considered in the design stage:

Ancillary Items:

Staircases

A staircase can either be a functional part of your mezzanine floor or it could act as an inviting feature of it, alluring customers and clients to explore your added level. Whatever your need is, our designers and safety experts are available to offer more information and talk you through all the features, design options, regulations and requirements of your staircase.

Decking Material

We offer a wide range of mezzanine floor decking designs and styles, whether for retail, office accommodation, storage platforms, industrial or for tiered structures. We will consult with you to ensure that suitable decking is installed to your mezzanine floor to fit with its function or the image that you require.

Handrails

All mezzanine floors require edge protection to all exposed edges for safety purposes. We offer a wide range of handrail options with different styles, colours and finishes suitable for retail and industrial settings alike.

Fire Protection

In some cases, where a mezzanine floor is used for storage purposes only, fire protection is not required. However, if the platform exceeds certain size parameters, or when people are occupying the mezzanine floor on a continual basis, then suspended ceilings, column casings and smoke detection will be needed to comply with building regulations.

Pallet Gates

Pallet gates are designed to allow the loading and unloading of pallets and stock safely. Our pallet gates are designed so that no edge is ever left exposed, heightening the safety of those operating it. This ensures that staff using a pallet gate at the edge of a mezzanine floor, are always safely behind a handrail. Robust and easy to operate with an up and over lift system our pallet gates are the easiest and safest addition to an industrial or storage used mezzanine floor.

Whatever your requirement we welcome the opportunity to visit your premises, assess your needs and provide a full CAD design service and quotation completely free of charge.

Double Skin Partitions

Titan

AVAILABLE ON
RAPID DELIVERY

PRICE ON
APPLICATION

ASK ABOUT OUR
INSTALLATION SERVICE

A high-quality double skin system that is ideal for cleanroom & office applications where appearance is important. When used in conjunction with the correct HVAC system, Titan is ideal for working toward an ISO 14644-1 class 5 cleanroom environment.

Options:

- » Flush double glazing with integral magnetic blinds; coved & bull-nosed skirting
- » Anti-static / electro-dissipative & anti-microbial powder coating
- » Sound reduction

Standard Powder Coated Colours:

Panels:

- » RAL9010
- » Other colours available upon request

Elan

AVAILABLE ON
RAPID DELIVERY

ASK ABOUT OUR
INSTALLATION SERVICE

Ideal for offices, facility areas, machine enclosures etc, where sound reduction & insulation are important.

Options:

» Fire rating, double glazing, ceilings & venetian blinds

Standard Powder Coated Colours:

Panels: sandstone, medium grey, white or light grey

The below price is a guide. Specific prices for projects are available upon request

BUDGET PRICE
(per linear metre)

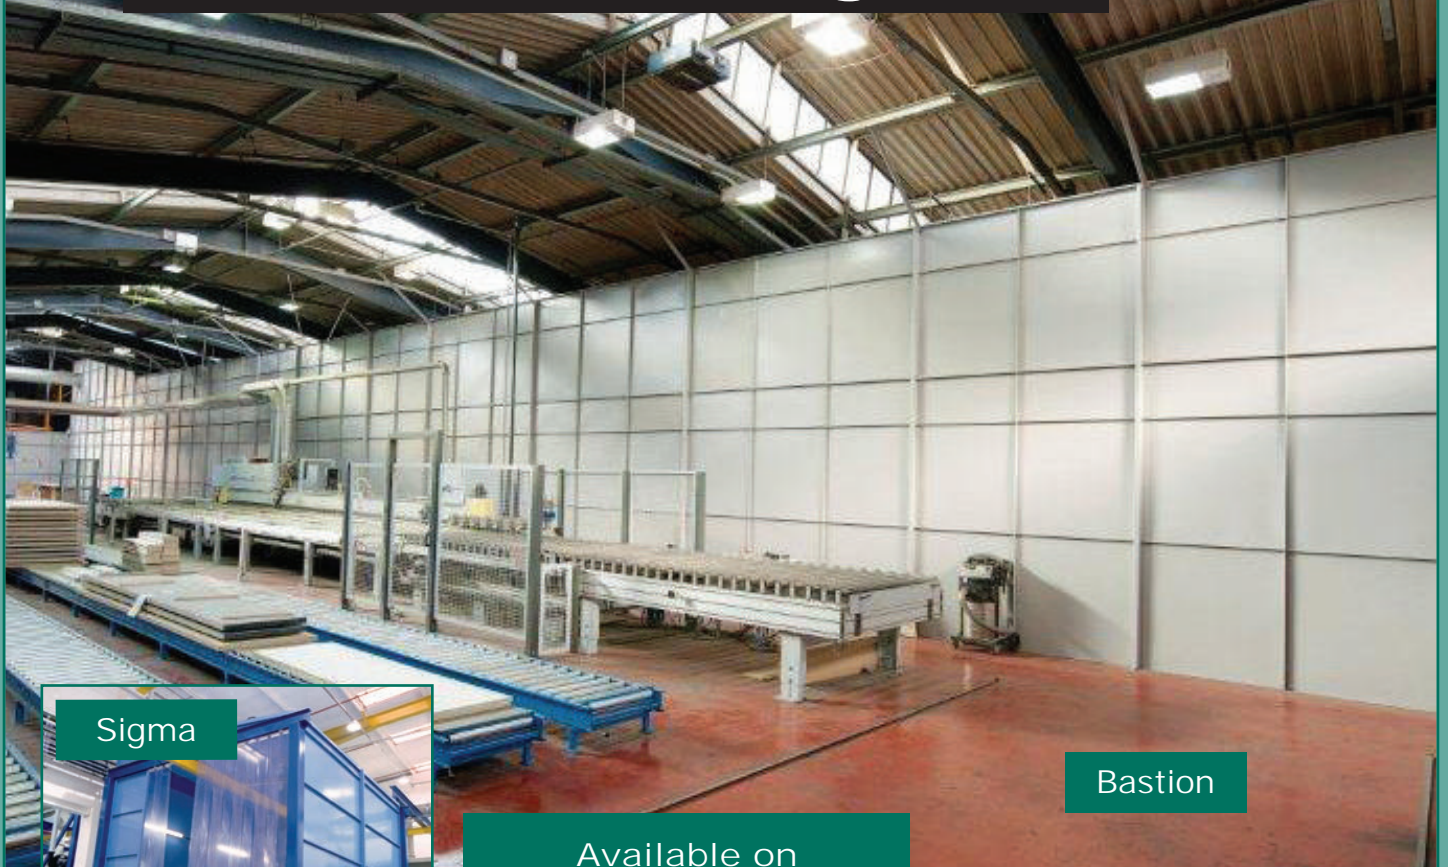

£269.00

Installation Service

Bastion

Heavy duty industrial partitioning suitable for harsh environments. It provides secure storage and screening and can feature a combination of full steel, mesh & glazing.

The below price is a guide. Specific prices for projects are available upon request	
BUDGET PRICE (per linear metre)	£141.00

Sigma

Demountable & relocatable medium duty partitioning, ideal for applications requiring high quality appearance

The below price is a guide. Specific prices for projects are available upon request	
BUDGET PRICE (per linear metre)	£155.00

Office Partitioning

Make the most of your space...

You may require a more open plan office or the opposite. Utilising the flexibility that Office Partitioning gives, you are able to create the space & / or individual working areas that you need. Having the option to increase privacy, sound reduction or add fire protection routes.

Whether it is a simple alteration or a complete office refurbishment it needn't be a daunting task. With our expertise, experience & skills in space planning we will endeavour to meet your requirements no matter how big or small the project may be.

- » Quick & easy installations - tailored to your individual requirements
- » Utilise space & create privacy where needed
- » Re-locatable – can be moved or extended to suit your future needs
- » Wide range of designs, finishes & accessories available
- » Fully glazed or partial glazed modules & doors
- » Fire resistance of up to 60mins
- » Sound reduction up to 50dB Rw
- » Integral colour co-ordinated blinds & other furnishings are available

Warehouse Solutions

Rack Inspections

The benefits of a Dexion rack inspection:

- » Comprehensive professional inspection
- » Certified & experienced inspectors
- » No need for delays in regular activity
- » Detailed inspection report
- » Prevention of person or goods damage
- » Extending life span of facilities
- » Preserving value, cutting maintenance costs
- » Early risk discovery minimizes repair costs
- » Follow-up offer for replacement parts & fitting of these
- » No need for warehouse employee involvement

Keep your warehouse safe

- By spotting early the details that cause damage

In any warehouse there will be small changes throughout the year, caused by moving goods & knocks through the daily use. These minor adjustments can change the capacity of the racks & lead to incidents, causing damage to both man & material.

Regular inspections will minimise the number & effect of these incidents, as it will be crucial to identify alterations at an early stage.

Dexion's rack inspectors are highly experienced & certified. They provide yearly inspections to keep your facilities safe & up to date. Every inspection is followed by an offer of suggested replacement parts including fitting. When fully approved, you receive an official plaque of approval for yet another year.

Our services at a glance:

Accurate visual inspection. The inspection is executed without any interruption of your working processes. The rack inspector controls (checks) the load capacity, the beams & frames and the safety guards.

Official Report & inspection

After inspection you get an official signed inspection report with recommendations concerning maintenance or further inspections.

Offer for maintenance

In case of maintenance measures you get a non binding offer as well as our competent support until recovery time of your racking system.

Long-term inspection plan

We develop together with you, due to your needs, your inspection plan.

STOMMPY® Flexible Barrier Systems Rackend Protection

A range of bollards & guardrails available to protect the most vulnerable part of warehouse racking. The rack end is protected from bumps, scrapes & collisions which inevitably lead to damage, safety concerns & extra repair costs. Guardrails can also be used to protect walls, doors & equipment.

STOMMPY® Flexible Barrier Systems Unique FIXA Block System® with 5 Year Guarantee*

STOMMPY® Shockproof products deflect but never break! Made from Tecklene®, STOMMPY® products are shockproof, rust & shatterproof, suitable for general warehouse use & certified for use in food processing & pharmaceutical environments. No more rust, expensive re-painting procedures or costs for replacing traditional bollards and guardrails.

The new patented floor anchoring FIXA Block System® has increased the pull-out resistance of the floor fixing to over four times that of a traditional floor anchor. All barriers are fixed within their footprint which ensures no bolt heads can be pulled out of the floor. The system is guaranteed not to damage the floor in normal warehouse impacts.

STOMMPY® Flexible Barrier Systems Pedestrian Segregation & Wall Protection

Highly visible, strong and durable. Keep pedestrian walkways clearly defined. Protect walls, equipment & the workforce.

STOMMPY® Flexible Barrier Systems High Visibility Bollards

High Visibility bollards can be used internally to protect columns & machinery; & externally in traffic & road access areas, effectively protecting areas in which vehicles are on the move. In external areas, a flashing LED light can be added to the top which is visible 360°. The LED light is equipped with a solar powered rechargeable battery. Long life LED. Available as D70 H1300mm or D120 H1250mm/H1750mm.

*The guarantee is subject to installation by our engineers & based on standard warehouse operation.

Industrial Buildings

Hire Range

Our hire range is an excellent way to save money on medium term accommodation requirements covering term from 3 months to 24 months. We have a unique low cost fixing mechanism, which is guaranteed to both save you money and allow instant storage solutions straight onto existing ground surfaces without the need to resort to expensive ground preparation works, yet still have full technical information on ground bearing pressures at fixing locations (essential for building regulations and safe installations).

Retractable or Fixed Frame Buildings

Our range of retractable and fixed frame buildings provides precision space for covered operational requirements for loading, holding and processing work. These buildings are available with modular docks and loading bays, both level and raised, offering retractable solutions for restricted access. As with the hire range, they will easily disassemble for transport to other locations.

Portal or Mono Pitch Frame Buildings

Portal frame and mono-pitch sheds and buildings provide total business accommodation solutions and may be fitted out by us with storage, crange, mezzanines and partitions providing you with the perfect modular accommodations at an affordable cost.

See below for our guide budget shell prices or request a free site survey.

Loading Bay Equipment

High Speed Doors

With opening and closing rates of 1 mps and a range of auto-operating options, these doors really speed up work, reduce accidents and help temperature management in the workplace. They can be fitted and operational in a day and have a low cost of ownership.

Loading Bays

A solution to loading on demand and fast roll-on / roll-off pallet and product turnround times. Prepare and marshal in advance or turn round HGV traffic in half the time with pedestrian control handling equipment and drive-in fork truck traffic. The systems have many safety and operational accessories all with proven results that cut costs and improve efficiency in the supply line process. Levellers can be made to task and have doors available as part of the package for the fully integrated door and dock leveller solutions.

Dock Shelters

Keep cargos dry and free of packaging contaminated by sealing of the trailers during loading. Need something out of the ordinary, then ask about our retracting tunnel shelters, canopies, 'angled' docks and pull-out shelters all accompanied by a full range of goods lifts, scissor lifts up to a 100 tonnes, loading platforms and fast doors. If this doesn't fix the problem, request an engineer and we will make it for you.

Dock Levellers

Information

**CUSTOM
DESIGNS &
FLEXIBLE
SOLUTIONS**

Dock levellers enable trailers to be left and marshalling to be conducted on the trailer, freeing up valuable floor space. It takes pressure away from warehousing and manufacturing operations whilst allowing hauliers the luxury of not having tractors permanently tied up awaiting loading/unloading. The speed of operations dramatically improves vehicle turn roundtime, which in turn means lower distribution costs. Need something special? Just ask!

Storage Machines

Refurbished Storage Machines

New Bespoke Storage Machines

- » Storage Carousels & Lift systems
- » Kardex, Megamat, Linpic, Hanel, Euromat, Modula
- » Service & Maintenance with or without contract
- » Loler Inspections and Safety Checks
- » Breakdown Service
- » Relocations on site or to new premises.
- » Modifications & Upgrades
- » Software
- » Complete Storage Solution Specialists

- » Almost 1 Billion Configurations with the Silo Range of storage machines
- » From Single Columns to 8 Columns
- » Inclusive of PC & basic software for the Silo range of machines
- » Flexible both Horizontally & Vertically
- » Complete back up Service
- » Can be linked into an existing software system if required
- » New Carousel Machines – Rotar

The Ideal Solution for Everyday use in an Efficient & Organised Work Environment
