Premium Economy Shelving

When all you need is more shelf space and you don't want to spend a fortune, Dexion Economy Shelving provides the simple solution you need. With a bolt free mounting system, adjustable shelf positions and high loading capacities, this cost-effective yet robust system can be assembled in minutes. Capable of holding 100kg per shelf in its smallest size and up to 480kg per shelf in its largest widespan size, the system provides high capacity, cost-effective and handy storage that won't break the bank.

Uses

Both Dexion Economy Shelving and Premium Economy Shelving systems can be used anywhere that simple storage is needed including:

Storerooms | Garages | Workshops | Maintenance Bays
Post rooms | Stationery cupboards | Studios | Offices
Outlet shops | Pop-up restaurants and shops

- Bolt-free makes it easy to assemble
- Steel uprights give it strength and stability
- Adjustable shelf positions make it easy to reconfigure
- Choice of load weights makes it versatile

We have kept it simple when it comes to ordering
The numbers relate to the load capacity per shelf, so all you have to do is decide which one is right for you.

Shelving Type	Overall Size H x W x D mm	Load Cap per shelf kg	Model	Price
Premium economy 80P	2000 x 1000 x 450	80kg U.D.L. painted shelf	49P6001	£179.99
Premium economy 80G	2000 x 1000 x 450	80kg U.D.L. galvanised shelf	49P6Z01	£159.99
Premium economy 150C	2000 x 1000 x 450	150kg U.D.L. chipboard shelf	49P6X01	£129.99

LS3 Longspan Shelving

Dexion Longspan shelving allows you to get maximum storage out of the minimum of space. With slim uprights, long strong shelves and stepped beams to provide a snag-free front face, it is the fast and easy way to solve your storage problems.

LS3 Longspan Shelving

Uses

Ideal for a wide range of big and bulky items and for archive storage.

Can be configured for many different applications, from low level hand-loaded shelving to high-rise shelving serviced by powered order picking trucks.

At home in either the warehouse or office environments.

Finish

Frames are pre galvanised and beams are painted RAL 9002.

Specifications

Upright Sections: 50/150; 50/175; 60/175; 60/200

Frames

Heights: 1500mm-5000mm
Depths: 450/600/750/900/1000/1200mm

Beams

Standard step beam:
Lengths: 1200/1500/1800/2100/2400mm

Garment Rail

Lengths: 1200/1500/1800/2100/2400mm

Shelves

Steel or 22mm chipboard.

Loading

Bay loads up to 4500kg and shelf loads 800kg per level.

- Can be assembled within minutes
- Simple to customise
- Medium and longspan bays can be combined in the same rack
- Adjustable storage heights and configurations
- Bolt-free lock-in to increase safety
- Footplates for stability on uneven surfaces
- Wide range of frame and beam sizes

Stage 1 pick your frame and beam length, stage 2 pick your shelf material.

Hi280 Shelving

Dexion HI 280 Industrial Shelving is a boltless, heavy duty and versatile storage system for use in warehouses, workshops, archives or stores. With high load capacities, open and closed bay options and a wide range of accessories the HI 280 is the clever solution that can be endlessly reconfigured, extended and adapted to suit changing requirements.

Uses

Can be installed as an independent manually operated storage system or as part of a larger fully automated system.

Can be built as traditional shelving system, narrow-aisle, mobile or as a multi-tier system.

Ideal for all small parts.

Bays can be used to store Electrical Sensitive Devices (ESD) when placed in appropriate anti-static packaging and bays are grounded.

Finish

The finished product is made out of pre-galvanised steel to give it strength and durability.

Specifications

The core of the system is uprights and shelves using starter bays and extension bays.

Hi280 is also available in:

Heights: up to 3000mm.

Widths: 900/1000/1290mm.

Depths: 300/400/450/500/600/800mm.

Standard starter and extension bay dimensions: 2100mm(h) x 1000mm(w) x 400, 500 or 600mm(d)

Hi280 Shelving

Each starter bay is supplied with:
2 pre-assembled end frames and 5 adjustable height beams with steel shelves that clip into place.

Extension bays can be added to create additional bays. These are supplied with 1 pre-assembled end frame and 5 beams with steel shelves.

Heights: Up to 12000mm
Depths: Up to 1000mm
Shelf widths: Up to 2500mm
Other dimensions available on request!

- Provides maximum storage for its depth as reinforcing cross bracing is not needed
- Beams and shelves clip onto place on pre-assembled end frames
- Modular design means it can be configured to suit your requirements - and reconfigured when your needs change
- Available as an open or closed bay system
- An extensive range of accessories mean that Hi280 can adapt to exactly match the items being stored
- Passes DNV GL conductivity test

Hi280 Bespoke Solutions

Hi280 is a very versatile system and can be used in numerous applications. Below are some examples of Hi280 applications.

Please contact us for help to design your bespoke solution!

Hi280 Narrow Aisle

The Hi280 narrow aisle shelving system is well-suited for your 24hr operation.

A shelving system in a narrow aisle installation demands accuracy and high stability. The Hi280 narrow aisle shelving system delivers on all fronts. In fact, with easy access for man-up trucks, or handling by automatic cranes, a narrow aisle storage installation offers a unique optimisation of storage space.

- Increase efficiency
- Save space & costs
- Components and shelves in pre-galvanized steel
- Fast assembly and rebuild

Hi280 Multi-tier

With integrated mezzanine, the Hi280 Multi-tier Shelving system is shelving constructed as two or more levels. Perfect if you have a larger warehouse storing multiple items.

- Cost-effective way to gain extra storage space
- Totally demountable and reusable
- Multifunctional for a variety of users
- Fire sprinkler and lighting systems easily incorporated

Hi280 Bespoke Solutions

Carton Flow

The Carton Flow Picking Unit system is a fast and flexible solution for you to transport components to assembly stations without interruption. You can also easily adjust the shelves and wheels to ensure efficient movement of various sized packages.

The system is flexible enough to allow for changing and evolving warehouse layouts, thanks to the fact that it can be built as a stationary unit, or supplied with lockable wheels.

- Adjustable, ergonomic racks
- Separate loading and unloading
- Reduces travel distances and picking times

Hi280 Ship Shelving

Keeping things shipshape when you're on the high seas can be a problem, which is why we developed ship shelving. Based on the popular Hi280 system, it's a special solution for teams working in marine industry applications.

- Quick installation
- Strong & solid structure
- System is adaptable to customer requirements
- Approved by NATO & Lloyd

Hi280 Bespoke Solutions

Hi280 Automotive Solutions

Operating an automotive workshop, you have to hold a wide range of spares while ensuring everything is stored safely and efficiently, yet easily accessible.

From exhaust pipes, to fragile windscreens – the various shapes and sizes of automotive parts make automotive storage a special challenge.

- Full range of specialised accessories
- Storage of differently-sized articles
- Multi tier option to maximise space

Hi280 Tyre Storage

Optimal storage of tyres is about obtaining the maximum amount of tyre storage in the available space without affecting the quality of the tyre – while ensuring efficient and ergonomic handling, through all seasons.

And this is what our products are designed for. Standardised components are assembled into a tailor-made solution – easy to install, durable in use, and easy to adjust and readjust again.

- Quick installation
- No corroding
- Strong & solid structure

P90 Pallet Racking

Dexion P90 is the logical choice when it comes to pallet racking systems. Why? Because it offers the most versatile solution for static and dynamic pallet storage, and it carries the Dexion name. It's a top of the range system with safety, versatility, strength and dependability built in.

The sizes you need:

- 16 upright sizes in a range of lengths.
- Structures can be created in excess of 30 metres high.
- 30 different beam section sizes available.

The features you need:

- Racks are simple to install, and quick and easy to adjust.
- Made from galvanised steel manufactured in Europe.
- Beams can be finished in tough bright orange stove enamelled finish, or pre-galvanised.

The adaptability you need:

- Suitable for all pallet types including euro, CHEP, disposable etc.
- Suitable for different fork lift truck types.
- Suitable for pallet handling and picking at level.
- Bespoke items can be manufactured for you.

The flexibility you need:

- Standard aisle pallet racking
- Narrow aisle
- Drive-in
- Pallet shuttle system
- Pallet flow
- Push-back
- Mobile pallet racking
- Wide aisle pallet racking

Pull-out Units

Within an optimised and efficient warehouse every item should be stored correctly and yet be easily accessible. Dexion has therefore designed the Pull-out unit to allow fast, but easy picking and storage of small or heavy items within the main pallet racking structure.

Efficient and ergonomic

Pull-out units are an important part of a highly efficient picking operation. They are designed to be pulled out of the racking with very little force, whilst containing a full load of up to 1000kg.

In their extended position, a person is able to reach all the stored items without straining their back or placing themselves within the racking.

Optimised picking

You no longer need to remove items from their original pallets, goods can be stored on the pull-out unit & picked by hand directly from the racking. Releasing the safety catch and pulling on the unit's handle results in the pallet and its goods being brought out of the rack into the aisle, making them accessible from three sides for hand picking.

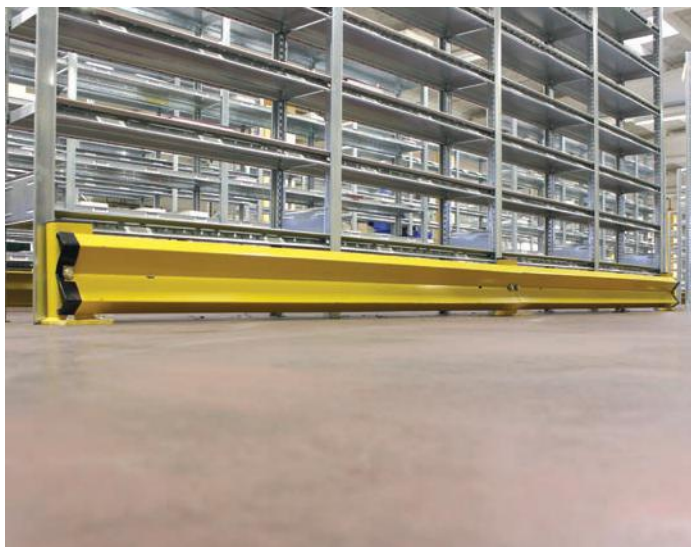

- Floor mounted application pull-out units - finish RAL 5010
- The units are universal & can be mounted onto beams - contact us for design check & pricing
- Other options available:
Euro 1200mm load face,
1000kg with 93% pull out
both universal & floor only types
Euro 800mm load face,
650kg with 100% pull out
- Special dimension pallets can be catered for - P.O.A.
- All loads are based on uniformly distributed pallet loads

Speedframe

A quick and straightforward way to build strong and visually appealing frameworks, Speedframe is the perfect solution when you want to build your own made-to-measure constructions.

Uses

From benches, trolleys and display stands to counters & workstations, the number of applications is endless. Its only limit is the users' imagination.

Specifications

- Sturdy 25mm tubes
- One piece reusable joints
- Pack size:
8 x 3.05m lengths

- Simply cut the square tubing to the required length & tap in the joints for a smooth and snag free structure.
- All constructs can be easily adjusted or dismantled & the components re-used.
- Large range of accessories.

Please note: Each joint requires an insert

Slotted Angle

The Dexion slotted angle construction system has been around for 60 years. It was the original slotted angle product - and is still the best. Whether it is used to build specialist shelving, racks, trolleys, benches, mounting jigs, suspension systems, security caging or support frameworks, it gets the right angle on every job.

Specifications

Speedlock Mk3

Speedlock Mk3 uprights & beams are manufactured using high quality steel and have a durable powder coated finish, which is available in a range of colours.

Additional Dexion Speedlock Mk3 parts are still widely available through our nationwide network of Approved Dexion Distributors for both repair works and extensions to existing pallet racking installations.

Today's components are manufactured to the same specifications and high quality as the original Dexion Speedlock Mk3 racking.

- All common sizes typically available from stock
- Extensive range of accessories

Uses
Only available for repair work and extensions to existing Speedlock Mk3 installations.

Contact us to find out about other sizes that are available to order and the range of accessories that are available for this system.

Cantilever Racking

Designed to meet nothing less than your precise requirements, our cantilevers are exceedingly versatile whatever your work environment, and with no front uprights, all levels are available to forklifts. They are specially designed to store various length items – steel bars, pipes, tubes, furniture, packs of timber; as well as boards, metal sheets, crates and boxes, or white goods.

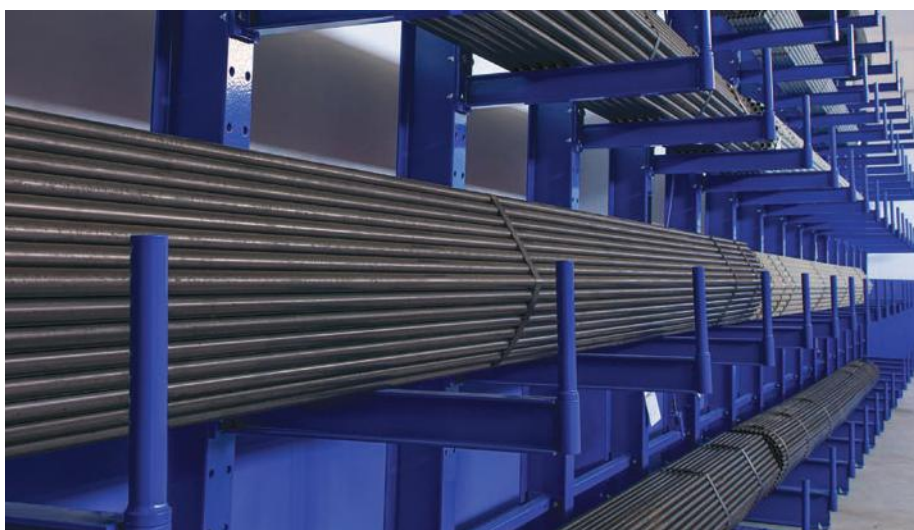

Additional arms, uprights and braces can be added as storage requirements change, while single and double sided configurations provide maximum storage capacity – be it on a single central column, or fitting tightly against a wall.

Please contact us for order enquiries and to find out more about cantilever!

Light duty cantilever

Light duty cantilever is a versatile, modular system for storage of long goods. With no front uprights obstructing load-placing and retrieval, all levels are available for DIY, manufacturing, plumbing & pipework, and workshop environments.

Heavy duty cantilever

Heavy duty cantilever is ideal if you need to store long and difficult items such as steel bars, piping, tubes or timber. Storage is horizontal, so can be handled manually or by forklift.

Heavy duty cantilever is a versatile, modular system for storage of long or large goods. It's perfect for all types of warehousing environments.

Mobile cantilever

Both duties of cantilever racking can also be installed on MOVO heavy duty mobile carriages.

This maximises the use of floor space as it needs only one operating aisle.

Automated Solutions

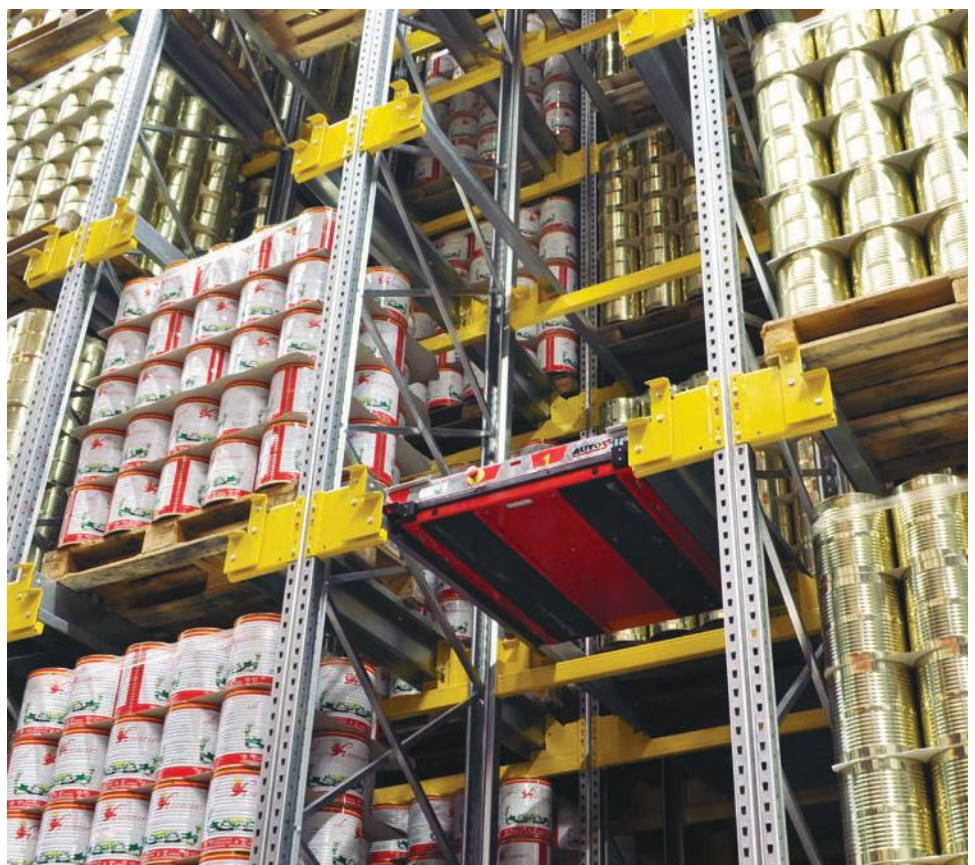

Some believe automation will cut staff costs, reduce errors and speed-up delivery times. Others are sticking to the tried and tested manual methods they've used for decades.

Thankfully, with the help of our expert team, you can find the solution that's right for your operation.

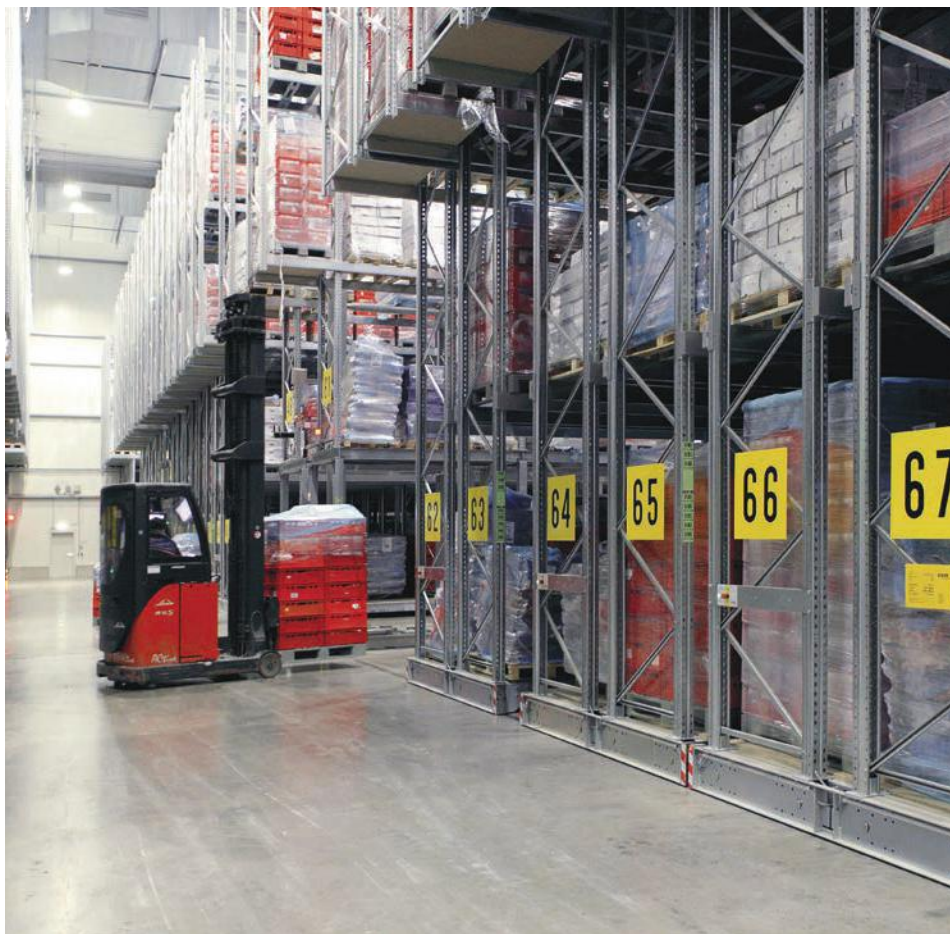

Shuttle

The Pallet Shuttle system is a semi-automated, high-density storage solution for the handling of goods inside channels similar to a drive-in or pallet-flow setup.

Cost-effective and time-saving, it removes the need for forklift trucks to enter the racking.

Automated Solutions

Mobile pallet racking (MOVO)

Mobile Racking (MOVO) is a dynamic solution providing up to double the storage capacity, in the same area, of conventional pallet racking. Offering technical superiority and total flexibility, MOVO is suitable for every kind of stored goods, and has a wide range of accessories.

The electronically controlled MOVO high-load racking system runs on in-ground rails and can carry bay loads of up to 24 tons at racking heights of up to 12 metres. While state-of-the-art sensor technology and variable control options ensure ease of operation and absolute safety.

Automatic Storage Machines

Our automatic storage systems can save you up to 70% on existing floor space, reduce picking errors by up to 70% and decrease picking time by more than 60%.

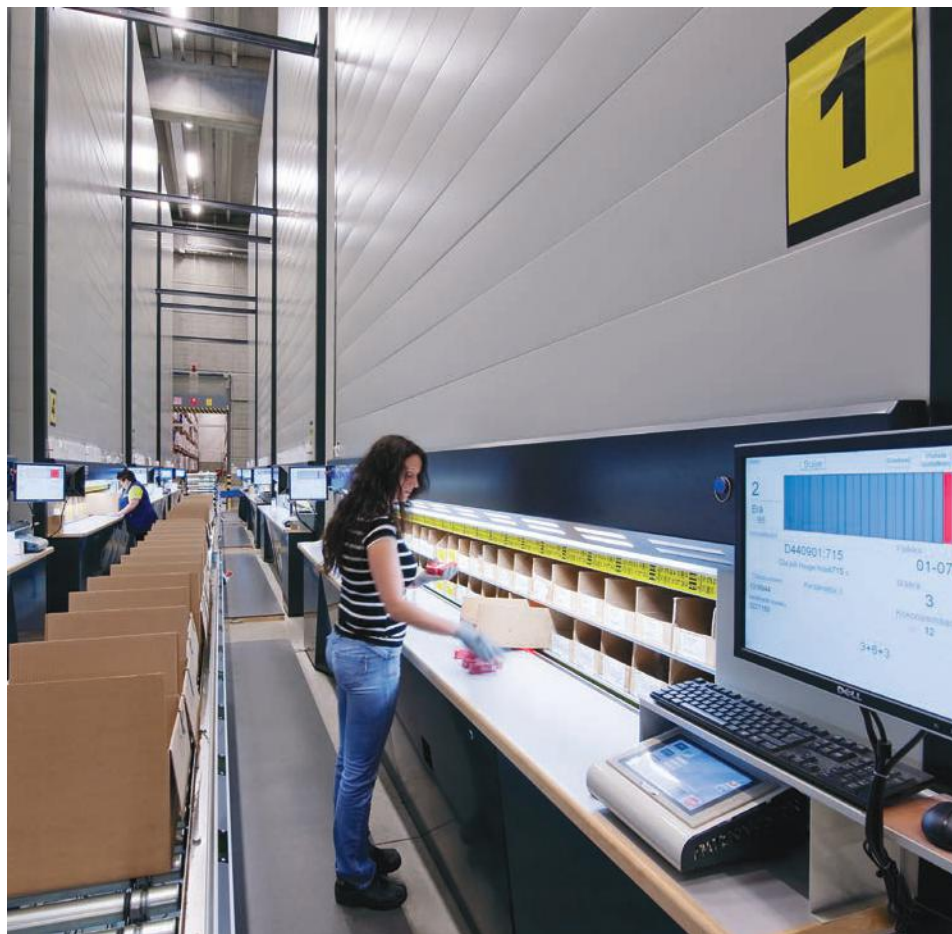

Computer-controlled, the vertical or horizontal storage machines easily integrate with your existing warehouse management system, but also operate effectively as a standalone solution.

Tornado automated vertical storage machine

An ultra-fast, virtually noiseless, computer-controlled storage and transfer lift system, the TORNADO is designed to maximise storage on the smallest possible footprint. Using the goods-to-person principle it cuts operator walking and waiting times, reduces search time and picking errors making it highly-efficient and energy-saving.

Automatic Storage Machines

Industrial Paternoster IPN (vertical carousel)

The IPN uses vertical rotation to transport goods to the operator by the shortest possible route, making it ideal for simple manual operation, host-controlled order picking or highly efficient batch-picking.

It is particularly suited for fast order picking of small parts and can be easily customised, with its shelving, intermediate shelving and partitioning equipment adaptable to various height requirements.

Kwikrack Shelving

- » Offers robust, effective storage for any application
- » The unique 6 fold channel beam offers high shelf capacities with a shelf height of only 54mm
- » No nuts & bolts required - the system simply taps together with the use of a mallet
- » Complete with 5 chipboard shelves
- » Total bay load: up to 1500kg U.D.L.
